Electronic Concepts Incorporated – Environmental Policy Statement

Electronic Concepts Inc. (ECI) commitment to environmentally responsible operations includes the following aspects:

- Maintain a substantial recycling program for metals, papers, plastics, cardboard, and other materials.
- Develop technologies in dry film capacitors eliminating the need for liquid impregnants used in oil filled or electrolytic capacitors.
- Capital investment in energy efficient production equipment.
- The elimination or minimization of toxic or ozone depleting substances in products and operations.
- Maintain a substantial growth of plants and trees planted on and around our facility.
