

Electronic Concepts

Film Capacitor Innovation

QESH Policy

Electronic Concepts manufacture capacitors in a quality, safe and environmentally friendly manner to meet clients' needs.

Electronic Concepts is committed to continual improvement, prevention of injury and ill health and environmental protection by preventing or reducing adverse impacts that could result from its activities.

Electronic Concepts:

- Will provide a safe and environmentally sound workplace by the implementation of safe environmentally sound work practices.
- Will identify, implement, promote and aspire to exceed best practice safety and environmental management in Electronic Concepts systems and operations.
- Is committed to operating in an environmentally sustainable manner by reducing waste and maximising the use of energy and resources.
- Will comply with all relevant International, EU and National regulations plus compliance obligations identified and will incorporate best practise for the sector.
- Will ensure that the Policy, objectives and targets are available to all employees, contractors, suppliers and clients and will work closely with these interested parties to develop and implement agreed initiatives.
- Will develop a monitoring programme to assess its performance. Electronic Concepts will integrate the Management Systems into our business and decision making process and measure our performance by setting objectives and working to achieve targets.
- Will conduct operations in a manner that is committed to continuous improvement, prevention of injury and ill health and pollution prevention.
- Will inform contractors and suppliers of our safety and environmental requirements plus encourage them to adapt safe work practices and sound environmental practices.
- Will ensure that our Management System is documented, implemented and maintained in accordance with the requirements of ISO 9001, ISO14001 and ISO 45001.
- Will hold regular Senior Management review meetings to ensure suitability and effectiveness of the management systems, this policy and the methods used for measurement.
