The following list represents the RMI's latest smelter name/alias information as of this template release. This list is updated frequently, and the most up-to-date version can be found on the RMI website: <http://www.responsiblemineralsinitiative.org/responsible-minerals-assurance-process/exports/omt-export/>. The presence of a smelter here is NOT a guarantee that it is currently Active or Conformant within the Responsible Minerals Assurance Process.

Please refer to the RMI website [www.responsiblemineralsinitiative.org](http://www.responsiblemineralsinitiative.org) for the most current and accurate list of standard smelter names that are Active or Conformant.

Names included in column B represent company names that are commonly recognized and reported by the supply chain for a particular smelter. These names may include former company names, alternate names, abbreviations, or other variations. Although the names may not be the RMI Standard Smelter Name, the reference names are helpful to identify the smelter, which is listed under column C in the Smelter Look-up.

Column C is the list of the official standard smelter names, in the ASCII character set. The majority of smelters will have the same entry for both columns, however if the common name varies from the standard name, the variation is noted in Column B.
