

## **ECI debuts new booth at Power Electronic Technology tradeshow.**

*Electronic Concepts, Inc. attends the 2006 PET tradeshow with a newly designed booth, in Long Beach, California.*

Electronic Concepts, Inc. further enhances the corporate image, by adding a newly designed tradeshow booth. The booth complements the recent release of the website and advertisement layout, which strengthens the Company's, already recognizable, brand.

The booth allows for an inviting atmosphere, encouraging perspective business partners, to view the company's breadth of product. Additionally, the booth has a separate area established to sit and discuss specific applications, and by utilizing online services to solve customer needs.

Come see the booth at the Applied Power Electronics Conference and Expo (APEC), February 25 - March 1, 2007 at the Disneyland® Hotel in Anaheim, California.

### **ABOUT ECI**

Electronic Concepts is a vertically integrated manufacturer, which designs and produces a comprehensive range of standard and customized film capacitors, serving a broad range of electronic industry markets since 1969.
